## REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record (Marsh et al, US 2003/0012345) teaches a method and apparatus for improved calling access wherein a user can access a voice mailbox but however, this function in a conventional sense by requiring input of a PIN initially during the call in (see paragraph 0073, 0075-0078).

Cai et al. (US Pat# 6,356,630) teaches a telephone calling card system integrating virtual destination numbers authenticating a user when access is given to an automated attendant in (see col. 5) after which a user can select a desired service.

The prior art of record fails to teach a method for servicing a prepaid subscriber account in a telecommunication system comprising the steps of: receiving an incoming call to a prepaid subscriber number; determining whether the incoming call *originates* with the prepaid subscriber number; charging the prepaid account if the incoming call is from the prepaid subscriber number and forgoing the charge to the prepaid subscriber account if the incoming call is not from the prepaid subscriber number as claimed and substantially connected in claims 1-21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
